SUMMARY

Software Engineer with 1+ years of enterprise experience in application stability and production environments, transitioned into Full-Stack Development. Proficient in building scalable web applications using the MERN stack (React.js, Node.js, Express.js, MongoDB) and Python. Certified full-stack developer adept at building end-to-end features, designing secure RESTful APIs, and implementing AI-driven automation workflows.

EXPERIENCE

Software Engineer

L&T Infotech

10/2022 – 01/2024
Chennai, Tamilnadu

- Collaborated with engineering teams to conduct root-cause analysis on critical production bugs, validating and testing hotfixes and post-deployment patches.
- Debugged production bottlenecks and optimized database queries (SQL), ensuring high availability and minimal downtime for enterprise web applications.
- Analyzed application logs and error reports to systematically troubleshoot and isolate application errors.
- Authored and maintained technical documentation, environment setup guides, and standard operating procedures (SOPs) to streamline team workflows.

EDUCATION

B.Sc - Computer Science

Prince Shri Venkateshwara Arts And Science College, University Of Madras

06/2019 – 06/2022
Chennai, Tamilnadu

- 85.3%

PROJECTS

QuickCart

Full-Stack E-Commerce & Delivery Platform React.js, Node.js, Express, MongoDB, Stripe API

Architected a full-stack e-commerce application featuring seamless product browsing, robust cart management, and order placement flows.

Integrated secure credit card payment processing using the Stripe API and managed cloud-based product image assets with Cloudinary.

Engineered responsive user interfaces with React and deployed a robust backend powered by Express.js and MongoDB onto Vercel.

Integrated Groq AI (Llama 3.3) to automatically generate rich product descriptions, significantly reducing manual content creation workflows.

Employee Management System

React JS, Node.js, MongoDB, REST API

- Engineered a full-stack Employee Management System featuring granular, role-based access control (RBAC) divided into Admin and Employee portals.
- Developed scalable RESTful APIs utilizing Express.js and MongoDB, incorporating secure JSON Web Tokens (JWT) for session management and user authentication.
- Implemented real-time attendance tracking with clock-in/clock-out triggers, automatic working hours calculations, and day-type classification logic (Full, Half, or Short Day).
- <https://ems-mern-two.vercel.app>  | <https://github.com/Vikneswari-123/EMS-MERN> 

SKILLS

- Languages: JavaScript, Python, SQL, HTML, CSS
- Backend & Databases: Node.js, Express.js, MongoDB, RESTful APIs
- Frontend Development: React.js, State Management
- Tools & Dev Practices: Git, GitHub, Claude Code, Vercel Deployment, JWT Authentication
